Play. Train. Compete.

Breathtaking Gameplay

Real Gaming - Real Sports

MultiBall is an interactive sports and gaming system combines digital games with real sports.

More than 25 applications were developed a part for **MultiBall**, which offer a variety of effective gaming and training experiences, through visual and auditory elements, different levels of difficulty and easy-to-understand gameplay.

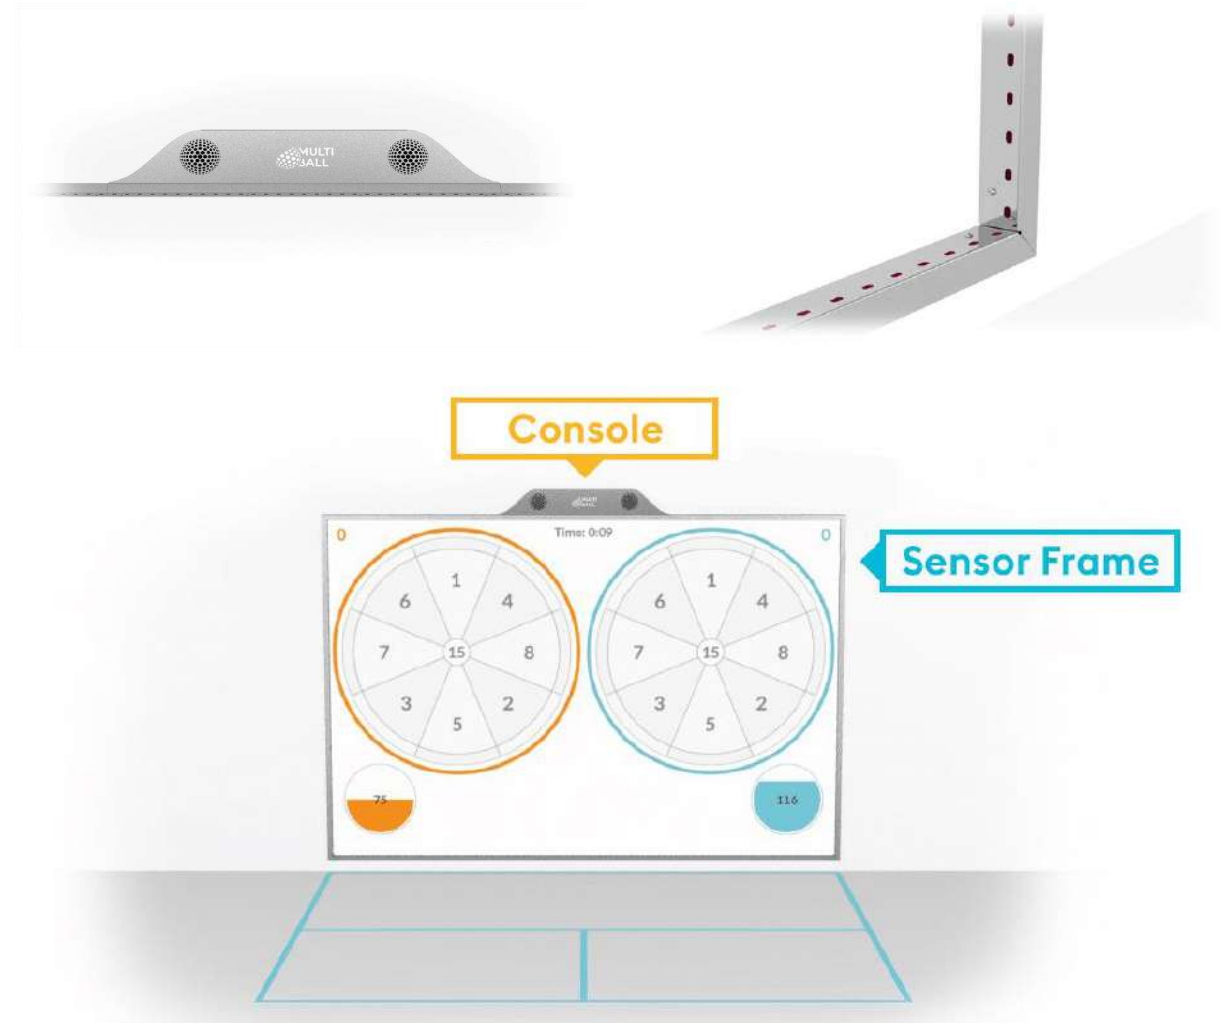

Watch Video

MultiBall consists of a sensor frame and a console including camera system that is able to track and process all types of ball detections and player movements in real time.

The system responds to balls hitting the wall during play, or player's movement in close proximity to the wall. This ensures the physical interaction of the player with the digitized games.

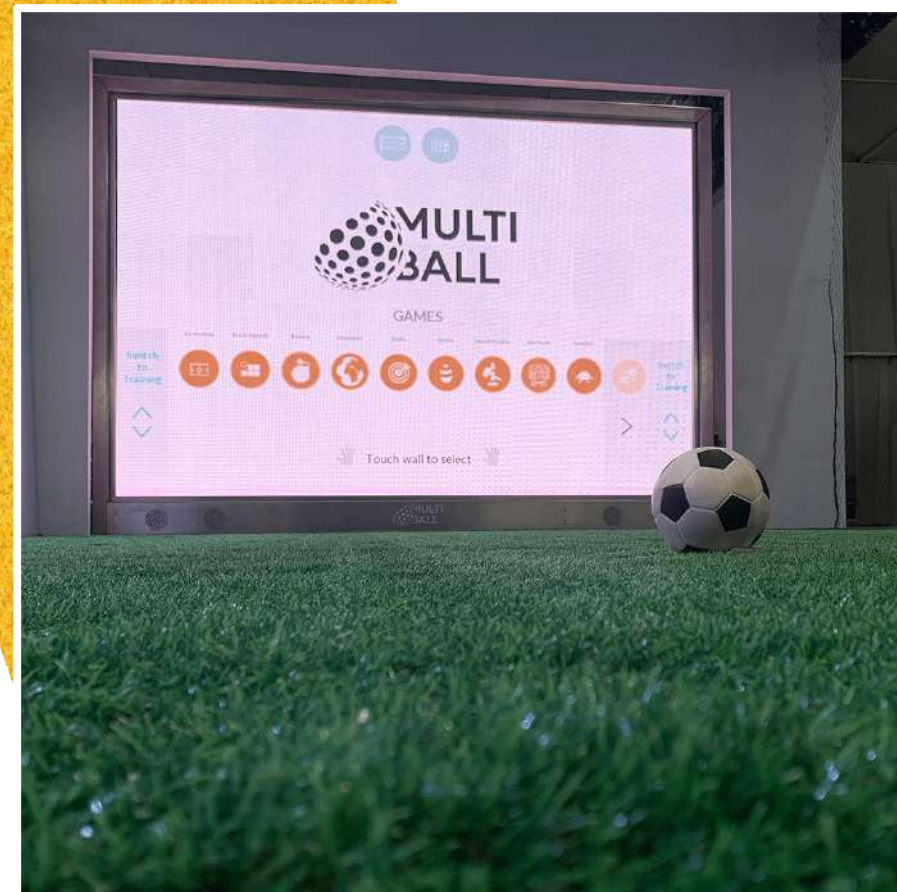

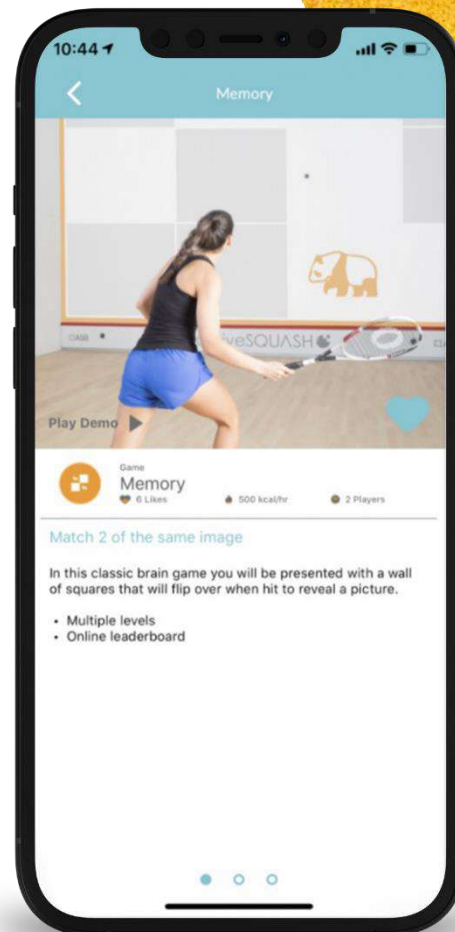

Easy as a Touchpad

How It Works?

The **MultiBall** menus can be operated directly on the projection surface (the wall). It is easy to learn and basically works like a giant touchpad. To select a game or change setting, place your hand in the corresponding area for one second. Another option is the **MultiBall** App, which can be downloaded free of charge for iOS and Android devices.

 Watch Video

Turn any wall into an interactive training area

MultiBall can be installed easily on any white wall. The hardware installation can be carried out in three hours, by a skilled craftsman. Every indoor and outdoor area can be transformed into an interactive gaming and training area, thanks to the availability of **MultiBall** systems in a variety of versions and sizes.

PHYSICAL GAMING EVERYWHERE

ALL YOU NEED IS A WALL

MAGICVIU

Physical and Cognitive Skills

The applications require dynamic and fast movements of the entire body to train cardio, coordination and balance. **MultiBall** also offers training modules to train target accuracy, hand-eye coordination, field awareness, perception and anticipation. Learning and education games like "Math Mission", "Countries" or "Memory" are designed to combine physical activity and cognitive skills. Due to the fun factor and challenging aspects of the games, your training becomes an intense full-body workout without one even realizing it.

Using the **MultiBall** app, coaches and players can constantly track their training progress, view personal results, and compete with other players in global rankings.

Interactive Sports Training

The **MultiBall** System provides interactive sports solutions for training of age groups and professionals for football, handball, Tennis, basketball, squash & club fitness Centers.

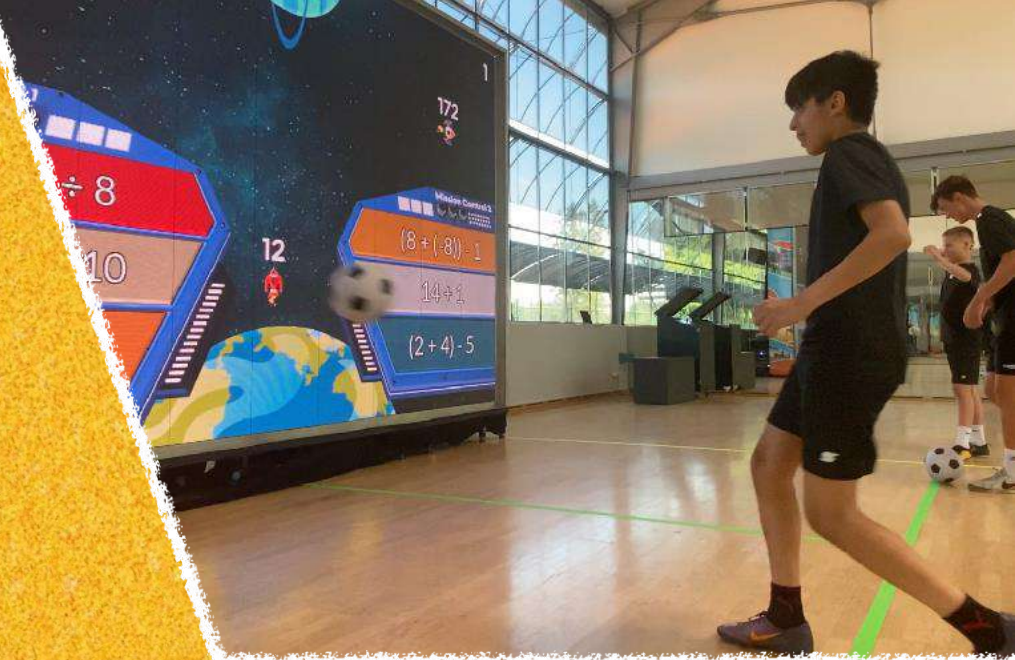

MultiBall developed, produced and built in Germany with highest industry standards covered by 5 years warranty on frame & sensor hardware components.

MultiBall Football Training Benefits

Benefits for Physical Abilities

To reach your full potential and achieve success **MultiBall** tests and trains players on reaction-time, field-awareness, precision and it all comes in the form of controlling the ball and making the right pass with perfect timing.

- Fast reaction and first touch
- Improved off-ball movement
- Better and more accurate passing
- Improved positioning and communication
- Combination Cardio and Technical Training

Benefits for Cognitive Abilities

Training sessions are designed to stress and challenge the athlete's brain, developing skills such as situational awareness, working memory, task switching, peripheral attention, and ultimately, decision making under pressure.

- Improved decision-making under pressure
- Sharpened focus and improved situational awareness
- Increased anticipation and faster reaction time
- Better divided attention and working memory
- Educational content

Become a Sports Innovator

Standout from other clubs and academies and attract new players and talents.

MultiBall is proud to have its system used by the German Football Boarding School (DFI), a worldwide recognized football school in Germany. DFI uses **MultiBall** for football training

At the end of a game, it all comes down to the numbers on the scoreboard. To make sure that your team comes out on top it is important to practice throwing skills in every training session. Now when you decide to work on your player's throwing and shooting abilities there are many details you can focus on. Our interactive **MultiBall** system helps you to keep your training sessions engaging, effective and varied.

Get MultiBall for your handball team or academy

Develop the capabilities of your players from the age groups or those affiliated with your sports academy to professional players using interactive **MultiBall** training systems.

MultiBall Interactive Tennis Training

MULTI
BALL

Interactive Tennis Training for Kids, Beginners and Professionals

The variety of games and training modules will keep your tennis players and coaches busy and motivated. Everybody loves to play. The challenging aspect of the **MultiBall** Gameplay in combination with instant visual feedback provides an exciting sports experience.

Hand-eye Coordination

MultiBall's fast-pace variable trains the body's ability to complete actions with correct timing and precision.

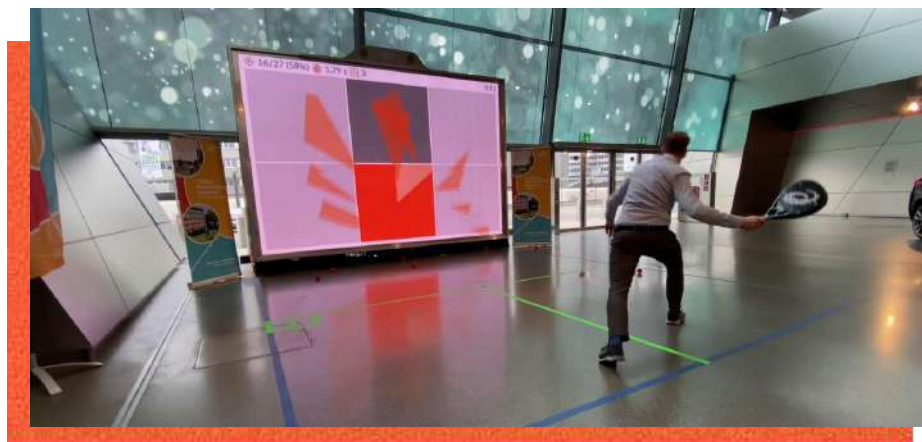

The system challenges a player to read the incoming shots which are determined by understanding the physics of the previous shot while also positioning themselves to strike the next shot with power. Lots of things to consider, but with positive results!

Mental Training

Tennis can be mentally challenging and complicated when emotions rush after every hit, every point, every set.

The **MultiBall** games give a feeling of joy and relaxation, therefore being a great complement to tennis. However, to beat the game you still will always need a strategy, challenging the player unconsciously as they need to evaluate their game plan and even sometimes, their opponent on Multiplayer games.

Target Precision

The system allows all level players to train their accuracy from a wide selection of games, most specific to aim.

With a smart wall and our high-end sensors, the exact position of the ball can be detected. This helps the student and coach calculate the exact distance from the target in order to recalibrate a player's accuracy and record improvements with our statistical feedback.

Fast-pace Cardiovascular Fitness

The fast pace and quick return of the ball allows for quick and slow muscles movements and reactions.

MultiBall comes with many exercise games which requires fast reactions in a high frequency to keep you moving. This high intensity sport and full body exercises raise the heart rate in ways that are harder to achieve through usual tennis training sessions.

MultiBall Interactive Fitness Training

The interface is displayed on a large screen in a gym. It features a menu with the following options:

Grid Type	Duration	Rule
	1 Minute	Normal
	2 Minutes	Timed Target
	5 Minutes	Left/Right
	Endless	

Additional elements include a 'Start' button with a right arrow and a 'Start' button with a down arrow. A person in a red shirt is interacting with the screen, and another person is visible in the background.

Focus on the Fun, Not the Burn

Make your clients smile and sweat

Imagine a room full of sweating and laughing members looking around in amazement at the end of the workout because they can't believe it's over yet. If you also show them their distance and calories burned, they will be absolutely thrilled. What happened?

How can MultiBall help you to keep your club members motivated?

Exercise can be boring and repetitive. But it doesn't have to be. Most people go to gym for specific goals: to burn calories, to shape their body, gain muscles, endurance training and so on. Well, you know the reasons. We also know how hard it is to keep up the motivation. By adding the fun factor and challenging aspects of gaming the workout turns into an entertainment experience, which means people do sports without even realizing it. That's the key to success

Watch these videos and imagine how your club members enjoy their workout.

The Most Advanced Training Tool in Squash

interactiveSQUASH

InteractiveSQUASH is a game-changing fusion of sports and technology. Immersive projection graphics showcase exciting video-game-style play to transform the classic game of squash into a completely new sports experience. It greatly expands the function of conventional squash courts to the most sophisticated digital training and coaching system for racket sports on the market. This is a court you've never experienced before!

The Wolf Nick Matthew OBE joins the future of squash

interactiveSQUASH 

“The sport of squash needs innovations such as interactiveSQUASH to ensure squash continues to be played on the world’s biggest stages. I am convinced technology is the driving force to maximize talent, unlock potential and glue aspiring young players to the court. Together with interactiveSQUASH, we aim to capitalize on the opportunities digitalization offers for court operators, coaches and players to boost the future success of our sport.”, said Nick Matthew, OBE. (British open & world open squash champion 3 times each)

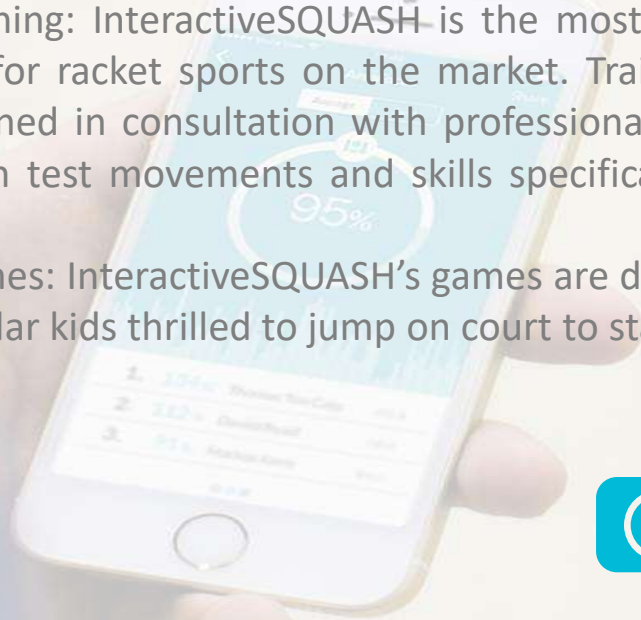

How can squash courts & fitness centers benefit from an upgrade?

With a broad selection of different kind of games, from retro arcade to the more creative and educational ones, every game has been developed to meet fun and entertainment with the need of improving players' skills like hand-eye coordination, speed, strength and reaction time.

InteractiveSQUASH training: InteractiveSQUASH is the most sophisticated digital training system for racket sports on the market. Training modules which have been designed in consultation with professional coaches and professional players can test movements and skills specifically related to competitive play.

InteractiveSQUASH Games: InteractiveSQUASH's games are designed to get everyone and in particular kids thrilled to jump on court to start playing.

Hardware Elements

interactiveSQUASH is an all-in-one upgrade package which can be installed on any existing squash court or fitness club

The interactiveSQUASH App is here!

The interactiveSQUASH App unlocks the best features of the system. Control the court, track your personal statistics, compete worldwide, and get the latest news and updates.

MAGICVIU

Engage with Your Customer Build a momentum for your clients and create a unique customer experience

In today's digital and "always-on" world, customers expect retailers to anticipate and meet their needs in real time. Activation events allow brands to create the experiences necessary to win the right audience, bring traffic in-store, and introduce new merchandise. These events draw customers out of their homes and therefore cannot be replicated online. The resulting in-store traffic is amplified by participants sharing their experiences online and laying down enticing optics for future in-store customers.

How can MultiBall help to drive more traffic in your shop?

Brand-activation events (sometimes called experiential marketing) have been used by large brands and scrappy startups to attract users and to get attention on social networks. While still a relatively new marketing channel, events can be extremely effective at delivering both in-store traffic and online accolades.

Customized Games

Provide your clients with a unique playful shopping experience and interact with your brand and products. We design your own customized games with brand visuals and products according to your Corporate Design.

Content Creation

People love to play and they will spend time doing it in your retail space. Once somebody started to play, the crowd will grow and attract more and more people. A full house in your store looks good on your online platforms.
