ARCHERY

ATHELETIC

Introduction

MAGICVIU

Archery is based on the basic form of traditional archery, using digital new media technology to create a real scene with great visual impact, allowing users to participate in it, bringing a multi-sensory immersive experience. The multi-mode setting satisfies the coverage of multiple types of people from beginners to challengers, allowing experiencers to fully experience the extraordinary archery experience of multiple roles such as contestants, hunters, soldiers, etc.

Content

Indoor and outdoor dual scenes, simulating weather resistance and multiple gameplay methods, adding weather system simulation (wind, rain, etc.) and different content modes for moving targets and fixed targets, which improves the playability and challenge.

Experience

Incorporating animation transition effects and simulating real archery sound effects, the sensory impact is strong, allowing users to experience more realistic and rich scenes.

Models

DYNAMIC STYLING

LEISURE

Next ▶

Introduction

The dynamic shape is derived from the entertainment games of the early variety shows. The physical wall is replaced by multimedia interaction, and the special effects music of different scenes are integrated. The real scene of the game is restored with high-quality pictures. The game has nearly 400 settings including martial arts, dance, classic movies, etc. The action and product gameplay are simple but not easy, which greatly stimulates the user's desire to challenge.

Content

More than 400 actions appear randomly, refuse to be repeated, keep a sense of freshness, and are highly entertaining.

Experience

Strong visual and sound interaction, suitable for couples and friends have fun.

MASTER OF MOTION

LEISURE

Introduction

Dynamic Master is a game based on traditional mobile game play, fusion of multimedia digital technology combined with L-shaped wall and floor, interactive game with music, with 3D visual overall effect as the core experience, intense and exciting motion tension, and dizzying dynamic special effects, Bring multiple sensory impacts to users.

Content

Different from traditional music games, Dynamic Master not only supports a single player mode, but also has a two-player cooperation mode. It seems to be simple to change, but it greatly increases the playability; in addition, the built-in music library reaches more than 100 songs and supports continuous updates. Ensure the sustainable stickiness of the product.

Experience

The use of Cave technology and the three-dimensional surround sound impact can truly immerse the experience in the cyberpunk-style musical dream factory.

Models

Break Mode

The Break mode is divided into single challenge and competitive play. There are three levels, each level has different songs, and the challenge score is settled/the winner is determined.

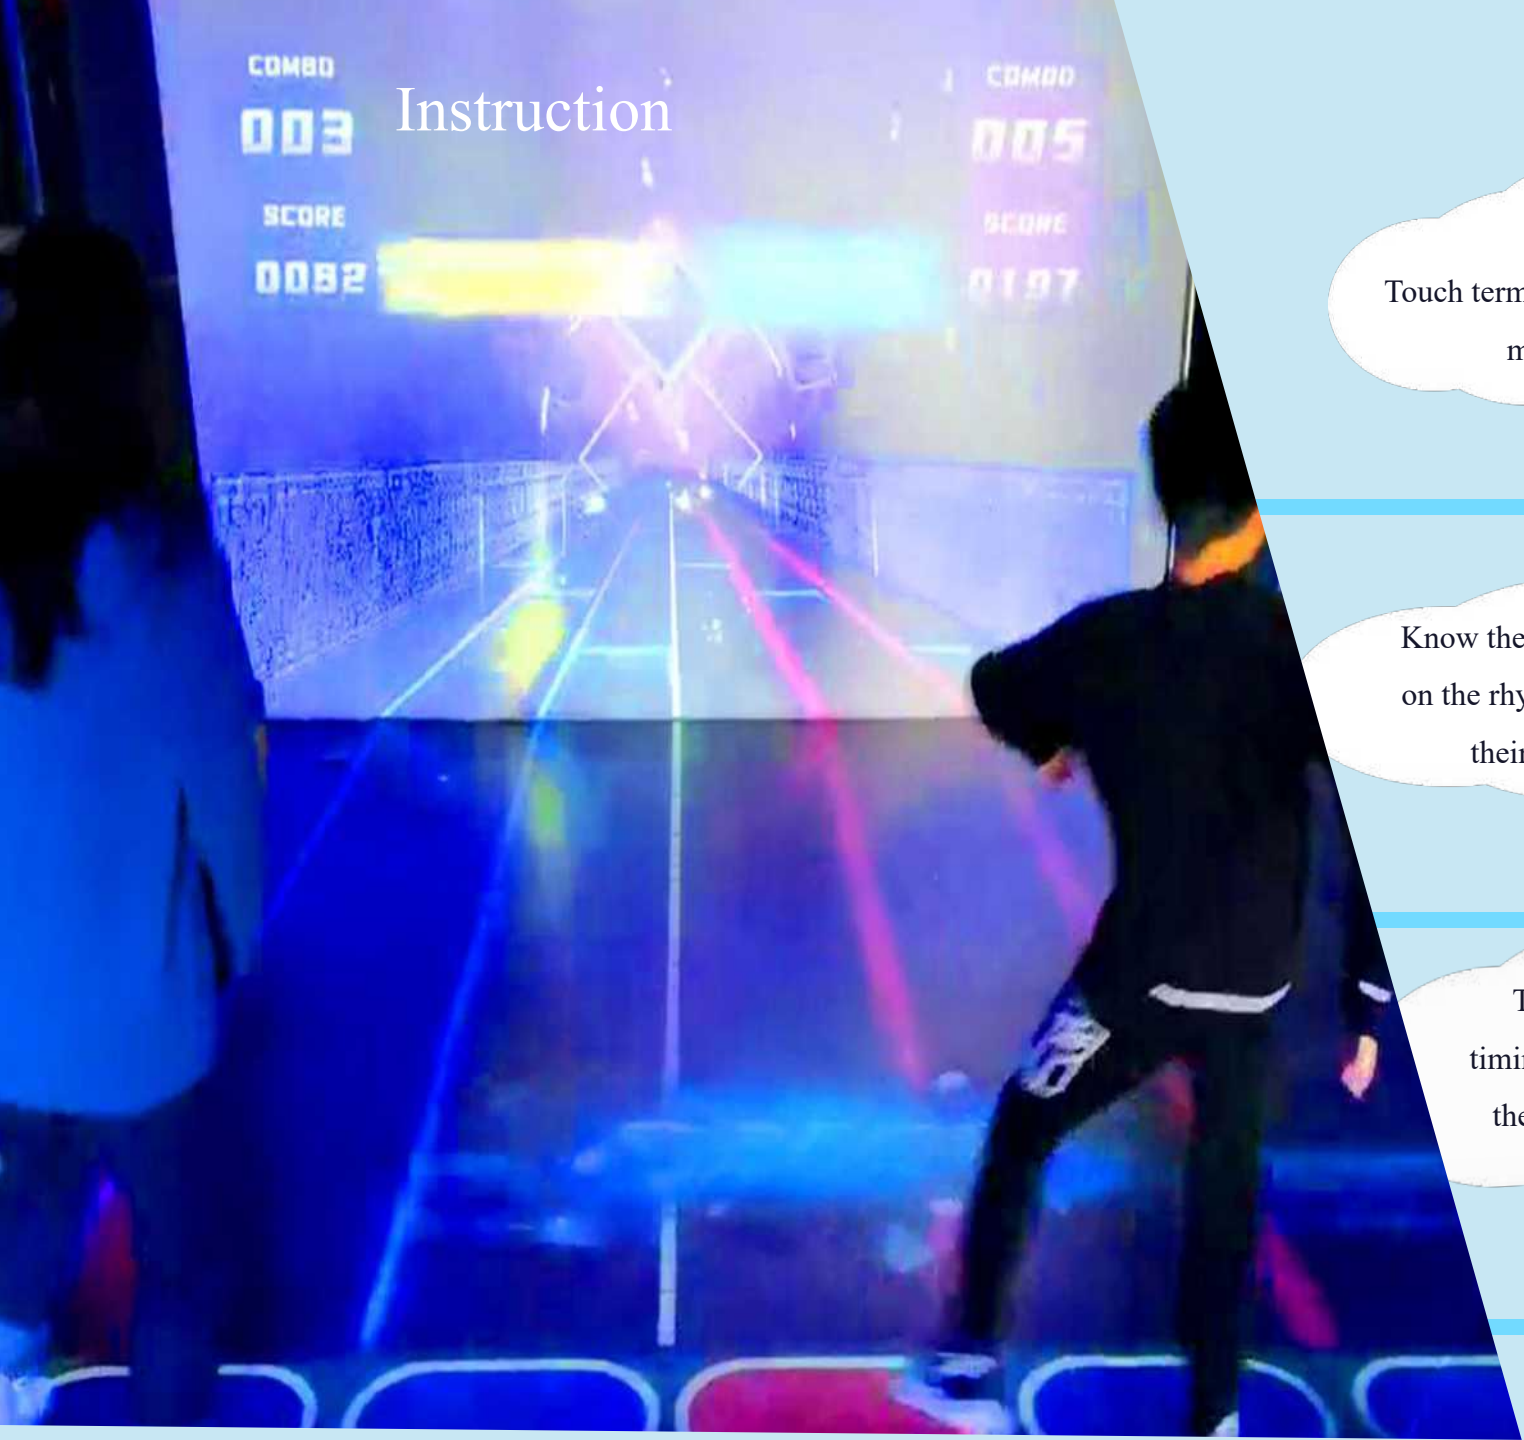

Experience Time: 15mins
